IMPLEMENTATION OF FAMILY WORK REFERENCES

National Institute for Health and Clinical Excellence (2009) Schizophrenia: Core interventions in the treatment and management of schizophrenia in primary and

Repper, D. & Brooker, C. (2002). Avoiding the washout: Developing the organisational context to increase the uptake of evidence-based practice for psychosis. Northern Centre for Mental Health Publication Series.

RESOURCES

Many of the articles in the reference list offer useful resources. Probably the best starting point to guide readers, and provide an overview of issues is the publication:

Copies of sample family work policies and implementation plans are available through the author, and the Somerset family service also have a range of policies and strategy documents, so making contact with those experiences in the area is useful.

Back copies of Meriden Newsletter available on the Meriden Programme website, www.meridenfamilyprogramme.com also contain useful articles e.g. on implementing family work in different service areas such as assertive outreach or on home treatment teams that readers will find helpful.
